Please replace paragraph [0041] with the following amended paragraph:

[0041] Half of the output shaft 54 is shown in cross section in the lower half of Figure 2. An axially-fixed conical disk 55 is non-rotatably connected with the output shaft 54. Additional conical disks 55 56, 57, and 58 are also non-rotatably but axially-displaceably connected with the output shaft 54. The two axially-displaceable conical disks 56 and 58 are coupled together by an inner threaded rod 59. In addition, the inner conical disks 55 and 57 are coupled together by the threaded bushings 60, 61, and 62. Furthermore, the pressure chamber between the conical disks 55 and 57 is sealed in a radially outward direction by a telescoping cylinder 64.
